

If elevated weather conditions, including potential fire risk, threaten a portion of the electric system serving a community, it may be necessary for PG&E to turn off electricity in the interest of public safety. This is known as a Public Safety Power Shutoff (PSPS). To help affected communities during a PSPS event, PG&E may open Community Resource Centers (CRC).

What is a CRC?

Community Resource Centers provide customers and residents with basic resources during PSPS events, including:

- A safe, energized location to meet their most basic power needs, such as charging cell phones and laptops or accessing Wi-Fi, where possible
- Up-to-date information about the PSPS event and timing of restoration

Resources for Customers

- Air-conditioned space
- Bottled water
- Power strips to charge devices
- Toilets and hand-washing stations
- Wi-Fi (as available)
- Tables and chairs

Speak with PG&E Reps

Customers will have the opportunity to **speak to PG&E representatives who can answer questions and take suggestions**. PG&E will also provide security personnel to ensure customer and employee safety.
