

Understanding Food Facility Inspection Results

The inspection violations are categorized by **Critical Major and Minor** (codes 1 – 23) and **Non-Critical** (codes 24 – 51).

Listed under each category is the code number(s) of the violation(s) detected at the time of inspection. If a “0” is present in the field, no violations in that category were detected at the time of inspection. If more than one violation in the category was detected, the code numbers are separated by a comma so that you may determine how many violations in that particular category were detected (i.e. 6, 14 equals 2 violations detected).

Refer to the **Food Facility Violation Codes** for a definition of each code 1 through 51.

***Tip:** Use the magnifying glass (Zoom in Tool) in the tool bar to magnify the document for easier reading of small print or use the screen size percentage drop down menu and select 100 %.*
