1131	<input type="checkbox"/> System Evaluation Sewage Disposal or Water (lab fees additional)	\$188	N/A
1141	<input type="checkbox"/> Tile de-watering system inspection (applies to any OWTS permit and includes two inspections)	\$292	N/A
1128	<input type="checkbox"/> Variance (2 hr minimum)	\$295	N/A

I understand that I will receive an invoice for any additional time spent (at the current hourly rate) which exceeds the paid fee; permits are valid for one year only; unissued permits are considered abandoned and will be denied without prejudice one year after application.

I have been provided a copy of both the Site Preparation Guidelines and the Environmental Health Refund Policy and both have been explained to me.

_____ **Initial**

Site Preparation Guidelines

Plans submitted for review:

- Plans are drawn to scale
- Well (or adjacent wells) are shown
- All structures are shown
- Property lines are indicated
- Required setback measurements are indicated
- Septic tank indicated (with setbacks)
- Septic system leach field and expansion areas are indicated
- Leach lines have the correct linear feet for proposed system
- If the parcel is sloped, the slope direction is indicated
- Leach lines conform to contour
- Detailed site plan includes location of all buildings, roads, driveways, property lines, easements, springs, wells, lakes, ponds, rivers, streams, drainage areas and other physical features; and also demonstrates the location of the septic tank, distribution box or drop boxes and leach lines.
- Plot plan consider: foundations, cut driveways, basements, retaining walls or garages

Prepare site for inspection:

- Uncover the septic tank lids (do not remove the lids)
- Uncover the distribution box or drop boxes
- Stake the ends of the leach lines

Site will be prepared for site evaluation – If these instructions have not been completed prior to our appointment time, a new appointment time and fee will be required.

- Two holes: 5' deep, 4' long and 2' wide
- Four corners of the property must be marked clearly with stakes and flagging material
- Lot needs to be marked with street address at the roadside
- If the property is heavily brushed or overgrown with thistle, a path must be cleared to both holes. Also, clear enough of the property in order to read the slope of the land.
- Roots blocking access to the holes must be removed so as to provide easy access.
- If there is poison oak in the area of the profile holes or along the path of a heavily brushed lot, it must be cleared prior to our inspection.

By my signature on the application, I certify that I understand what I am applying for and how I must prepare the subject site for inspection and that if I fail to properly prepare the site, a new inspection and fees will be required.

NOTICE

EFFECTIVE DATE 7/9/2020

Environmental Health Land Program Refund Policy

- 1. Refund requests must be submitted in writing, using form RF-001.**
- 2. Refund requests are subject to 10% retention of the permit or service fee.**
- 3. Refund requests are subject to 50% retention of the permit or service fee if an inspection has been performed.**
- 4. Permits can be renewed BEFORE the expiration date and will be extended for another year (expiring two years from original date of issuance).**
- 5. Expired permits are non-refundable.**
- 6. Applications / unissued permits expire after one year.**

Any customer requesting a refund must complete the Refund Request Form (Form RF-001).

By my signature on the application, I certify that I have received a copy of the Environmental Health Refund Policy and I understand the circumstances of refunds.
