

Plantings for Wildlife & Clean Water

Vegetation plays an important role in the local ecosystem. All plants provide essential wildlife habitat, and aquatic plants also help to clean the water by removing nutrients through biological processes.

Upper Riparian Zone

Trees	Oregon ash California ash Box elder Valley oak	Shrubs	California wild grape Blue elderberry Wild rose
--------------	---	---------------	---

Lower Riparian Zone

Trees	Shining willow Red willow Fremont cottonwood	Shrubs	California - blackberry Arroyo willow
--------------	--	---------------	---

Transitional Marsh Zone
